WHAT IS VERA?

VERA (Virtual Experience Research Accelerator) is an NSF-supported project that enables the public to participate in large-scale scientific studies using VR equipment. We are exploring the possibility of library partnerships whereby patrons could participate in the research and discovery.

WHY WORK WITH VERA?

- Position your library as a site for human subjects research and discovery
- Empower your patrons to contribute to science by participating in studies
- Use your library's existing VR equipment or request a headset from VERA
- Receive support, resources, and guidance from the VERA team
